STORM PLASTICS LIGHTNING FLASH PAGE 1

▶ Volume 1, Issue 6

TECHNICAL NOTES

Are you up to date with reactive soils?

Since our last issue where we mentioned we had run seminars in Emerald, Rockhampton and Gladstone on the problems associated with reactive soils, well we have been busy again organizing another series in Cairns, Townsville and Mackay.

These are scheduled for March 2009 and the proposed dates are 23rd in Cairns, 24th in Townsville and the 25th in Mackay.

At this stage we hope to have a soil engineer with me as well as input from your local Council, the BSA, Master Builders and the Master Plumbers.

As venues are confirmed and times locked in we will issue a flyer with all the details.

At Emerald and Rockhampton we had over 60 attend each event, mostly Plumbers along with Merchants' and Council staff, Builders and Engineers.

EXPANDA BENDS IN 100MM AND 150MM, IN 45 AND 90°

Trust this logo, it is our symbol of quality on which you can rely. Fifteen years in the ground and every product still performing.

As well as our 100mm & 150mm Expanda Joints we also make Expanda Bends which are like an Expanda Joint without the internal slider and with a 45 or 90 degree bend welded to it.

Very handy if you are in a tight spot and still need to allow for soil movement.

WHAT WOULD YOU LIKE MADE OUT OF FLAT PLASTIC?

WE RECENTLY HAD AN ENQUIRY FOR A NEUTRALISING TANK AND YES, WE MAKE THEM TOO, AS WELL AS SPECIAL SAFE TRAYS FOR MANIFOLDED WATER HEATERS.

DON'T JUST SAY "NO IT IS NOT AVAILABLE", IF YOUR CUSTOMER HAS AN ENQUIRY, SEND IT ON TO STORM PLASTICS, OUR CREATIVE TEAM CAN CUT, BEND, FOLD, WELD UP AND MAKE ALMOST ANYTHING OUT OF FLAT PLASTIC.

Phone Des Grevell or Steven Moore on 38654811 or fax your drawing to 38654877

ARE YOU KEEPING UP WITH INDUSTRY EVENTS?

Did you go to the Institute of Plumbing Inspectors conference at Hervey Bay in October.?

Did you go to the Foundations & Footings Society conference on the 7th and 8th of November at the Gold Coast, mainly about reactive soils?

Did you go to the NPRF in Adelaide?

Did you go to the MPAO Plumbers' Forum in Oct.?

MR. PLUMBER, WHAT DO YOU KNOW ABOUT “LOW V.O.C.’s”

Did you know that solvent cements and cleaning fluids used to have some little nasties in them called VOLATILE ORGANIC COMPOUNDS or VOC

A new mix of Type N solvent cement will soon be available from BOSTIC and they have drastically reduced those little nasties.

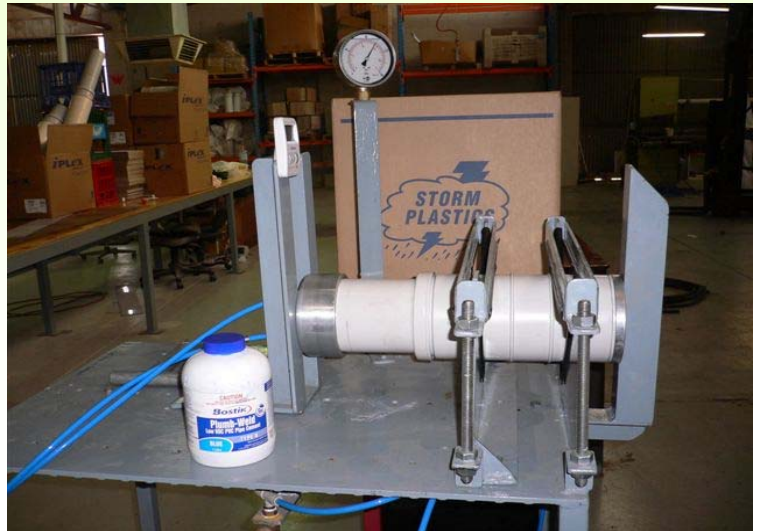

That’s why it is called low V.O.C. cement.

The new mix of Type N solvent cement has been extensively tested by BOSTIC on PVC to PVC joints, proved to be successful and will be warranted by the Manufacturer for use in PVC to PVC joints when used in compliance with AS/NZS 3879.

At Storm Plastics, we have conducted our own exhaustive in-house tests to ensure our PVC Expanda Joints and Swivel Joints are compatible with the new “Low V.O.C solvent cement”

If you do not wish to receive further editions of our newsletter, the “Lightning Flash”, please click on REPLY, type UNSUBSCRIBE in the subject line and click on SEND.

This is issue number six, if you would like copies of previous editions or if you have received this other than by email and would prefer it by email, then to receive it by email please email your email to this email, desgrevell@stormplastics.com.au

OF COURSE WE KNEW THEY WOULD BE COMPATIBLE BECAUSE THEY ARE MADE OF PVC-U BUT JUST TO BE SURE WE PUMPED THEM UP TO 85kPA AND THEY PASSED THE PRESSURE TEST 100%.

YOU CAN BE ASSURED THAT WE AT STORM PLASTICS ARE UP WITH THE LATEST DEVELOPMENTS IN PVC-U GLUE AND WARRANT OUR PVC PRODUCTS WHEN GLUED WITH THE NEW “LOW V.O.C. SOLVENT CEMENT” when used in compliance with AS/NZS 3879.

What was the name of the swagman in the song, Waltzing Matilda. First correct reply, as I understand it, on the qld@stormplastics.com.au computer screen may win a \$5 scratchie

MERRY CHRISTMAS.
