

HOUSEBOATS and SMALL INLAND VESSELS

With today's ever increasing popularity of river and lake users in Houseboats or small vessels, pollution and discharge problems are becoming serious and now legislated in various states.

Storm Plastics (SA) Pty Ltd have, in conjunction with authorities in the EPA, produced the below new products, in an effort to keep the pristine quality of our Australian inland waterways, yet maintain your level of personal comforts.

For further information please call the below listed number or check out our website www.stormplastics.com.au
